OAKLAND UNIFIED SCHOOL DISTRICT
Office of the State Administrator
March 9, 2005

To: Randolph E. Ward, Ed.D., State Administrator for the Oakland Unified School District, and the Board of Education

From: Timothy E. White, Assistant Superintendent of Facilities Planning & Management, Buildings & Grounds and Custodial Services TEW 3/03/05

Subject: **Agreement for a Routine Maintenance Contract with Simplex Grinnell for Repair Services at Districtwide Fire Alarm Repair Project in an amount not-to-exceed $250,000.00.**

ACTION REQUESTED
Approval by the State Administrator of a Small Construction Contract on behalf of the District with Simplex Grinnell for Construction Services at Districtwide Fire Alarm Repair Project in an amount not to exceed $250,000.00. The term of Agreement shall commence December 1, 2004 and shall terminate on December 1, 2005.

BACKGROUND
Over the years the District has installed a large number of Simplex Grinnell Alarm Systems in many of its schools. While other vendors can provide service to many of these systems Simplex Grinnell can provide service to all of them. For this reason and the familiarity that Simplex Grinnell has with its own systems the District is making this contract with Simplex Grinnell to provide ongoing service for its Alarm Systems.

STRATEGIC ALIGNMENT
Among the key purposes of the District's Facilities Master Plan is to provide an academic environment for the Oakland community that will give every student, educator, and community member using our facilities the best possible opportunity for learning.

Through implementation of the Facilities Master Plan, the District intends to improve the District's facilities in terms of structural integrity, safety, reliability of operating (mechanical) systems, access to modern resources, number and type of appropriate laboratories and specialized instruction rooms, opportunities for physical education, and attractiveness, such that the Oakland Public Schools are second to none. Operation of the District schools under the

planned approach is intended to ensure safety, cleanliness, and orderliness for all individuals participating in the learning process.

The basic facility needs of students such as proper lighting, functional roofs, noise control and well maintained buildings, not only convey the message that we value our students and teachers but may foster a sense of school pride and community ownership which may improve attitudes towards learning. The implementation of the Facilities Master Plan is our first step in that direction.

DISCUSSION

Simplex Grinnell will provide ongoing maintenance and repair to District Fire Alarm Systems on an as needed basis.

FISCAL IMPACT

The funding source for this project is Developer Fees.
